Jenny Medina
Senior Hiring Manager
Viome, Inc.
(373) 232-7224
jenny@viome.com

Dear Ms. Medina:

My advanced work experience in applied statistics, SQL, and Python makes me an ideal candidate for the internship position at Viome. In my current role, I implemented big data analysis techniques and learning algorithms that optimized classifiers across the company.

Mathematics and wellness are my two main passions, as shown by my bachelor's degree in applied statistics, master's degree in nutrition, and pursuit of a Ph.D. in data science. Recently, I started working toward the Data Science Council of America (DASCA) Senior Data Scientist (SDS) award.

I would love the chance to work at your high-tech startup. The skills I've acquired can transfer perfectly from a business-driven data science role to a dynamic smaller company with a humanitarian mission. My achievements include:

- Using data mining techniques and machine learning to forecast product sales with 96% accuracy
- Performing ad-hoc social media analyses to help the sales and marketing department streamline the acquisitions process

I'd be delighted to set up an interview so we can discuss your company's internship program further. Please let me know a date and time that suits you. Thank you very much for your consideration.

Sincerely,
