[month, day, year]

Dear Ms. Hickman,

Designing and implementing a new stock management system that cut down on medication waste by 34% was my crowning career achievement in 2020. I believe that my strategic skills and excellent technical knowledge will make me an asset to the CVS Health pharmacy team.

As a technician with three years of experience and a drive to use my skills to impact people's well-being positively, I want to be part of CVS Health's mission to empower its clients through health education. I know that the role requires a compassionate and caring individual with excellent attention to detail, and I believe that my recent achievements are evidence of my suitability. These include:

- Achieving a 98% patient satisfaction rating during my pharmacy's most recent client feedback cycle.
- Assisting with training two new technicians to expand their understanding of OSHA regulations.
- Receiving a workplace commendation for my ability to switch seamlessly between workstations without compromising accuracy or efficiency.

I am excited to explore how my experience and abilities make me the ideal candidate for the pharmacy technician position at CVS Health. Please get in touch to schedule a convenient appointment.

Sincerely,

Janine Gomez

P.S. I would also like to explain why I was selected for vaccination training in 2020.
