[month, day, year]

Dear Mr. McCloud,

Last year, I saved Freedom Electronics over 17% in labor costs by introducing a streamlined shift system that reduced overall work hours and increased productivity.

I have over 17 years of experience as an installation electrician, and I can install and repair a wide range of appliances in commercial and residential properties. I understand that Home Helper Electrics is planning to expand into the commercial sector, and I believe that my years of experience in commercial electronics make me an asset to your team.

Some of the highlights of my career include:

- Project managing the installation of all electrics in a 10-story commercial building
- Assisting in the design of new tools to make the electrics team more efficient during complex projects
- Winning employee of the year three times in a row due to my professional contributions to Freedom Electronics.

I'd love to discuss some of the more intricate projects that I have worked on in my career and how I can help your company move forward. Please feel free to contact me with a date that suits your schedule.

Kind regards,

Jonathan Taylor
