[month, day, year]

Dear Mr. Johnson:

During my time with Corbin Law Firm, I advised clients on various environmental litigation issues for multi-million dollar projects, including crisis management, incident response, and criminal enforcement actions. I hope to bring my legal expertise to your organization in the associate attorney role.

Engel Legal Associates' reputation as one of the premiere law firms for climate change-related issues draws me to apply for this opportunity. Throughout my career, I've advised various clients on environmental compliance. I can provide value to your firm based on my career achievements:

- Provided legal support to businesses regarding water quality permit compliance, stormwater pollution prevention, hazardous waste spill cleanup, and cost recovery litigation
- Advised clients on the potential implications of climate change on complex business decisions, including long-term environmental compliance
- Researched legal issues and drafted internal strategy memos, motions, and briefs

I look forward to telling you more about how my knowledge of environmental regulatory compliance could benefit your clients at Engel Legal Associates. You may contact me via phone or email for any additional questions you may have on my background. I appreciate your time and consideration.

Sincerely,
