[month, day, year]

Dear Mr. Jackson,

I'm reaching out in regard to the senior web developer position with Sunrise Web Solutions. As you can see from my attached resume, I have over 10 years of experience architecting and developing interactive websites for enterprise clients. My comprehensive background in search engine optimization (SEO) strategy, user-centered design principles, and web development makes me an ideal candidate for this role.

Sunrise Web Solutions is well regarded for its forward-thinking and collaborative work culture, which strongly aligns with my professional background. As a technical leader, I excel in building, mentoring, and managing diverse teams to develop exceptional web designs. I can enhance project delivery for your organization based on my career achievements:

- Built over 30 custom websites for enterprise clients valued at up to \$3 million, collaborated with UX and user interface (UI) designers, and successfully increased monthly web traffic by up to 30%
- Managed a team of 20 developers and led meetings with client stakeholders to ensure project alignment with business requirements and user-centered design principles
- Translated prototypes, designs, and wireframes into quality websites and web applications and identified opportunities to improve the UX, resulting in a 5% increase in time on page

I look forward to telling you more about how my technical leadership could help your team continue to grow and excel. Feel free to contact me for any additional questions you have about my

experience. Thank you for your time and consideration.

Best regards,

Amar Singh
