[month, day, year]

Dear Ms. Jennings,

As a recent graduate in computer science, I developed an advanced knowledge of software development during my academic career at the University of Pittsburgh. I achieved a GPA of 3.8 while completing high-level courses in Java, Python, application development, and object-oriented design. I am confident that I can apply these technical skills to succeed in the computer science intern role.

Pittsburgh Software Corp's reputation for creating award-winning mobile applications is what leads me to apply for this position. I believe that I can leverage my software development expertise to further grow this reputation based on my academic achievements:

- Developed an application using Python to categorize songs, albums, and musical groups into appropriate genres based on audio
- Created quality code for the creation of a Black Jack application simulating different hands and quizzing users on correct play based on statistical chances of success
- Developed a mobile alert application for students to manage deadlines for assignments and deliver reminders before the start of class

I would like to schedule an interview to tell you more about how my advanced Python programming skills can aid your company. Feel free to contact me via phone or email at your earliest convenience. Thank you for your time and consideration.

Sincerely,  
Raymond Johnson
