[month, day, year]

Dear Mr. Jackson,

Upon completing my bachelor's degree in UX design from Boston University with a 3.8 GPA, I began my career as an intern for Digital Solution Partners. I collaborated with the UX Design team to develop UI for software and mobile applications for a start-up technology company. Through these experiences, I developed an expertise in user-centered design principles, which I believe makes me the ideal candidate for the UX designer position with your organization.

UX Solutions Inc.'s reputation for innovation draws me to apply for the position. I have a passion for developing creative solutions to improve the UX that strongly aligns with the goals and needs of your organization. I am confident I can deliver valuable contributions to your team based on the following achievements from my professional experience:

- Drove the development of UI designs and identified continuous improvement opportunities based on key performance indicators (KPIs), customer feedback, and market data
- Collaborated with project stakeholders to develop prototypes, conducted wireframing, and discussed strategies to enhance UI across the mobile application
- Improved positive responses from users by 20% on online surveys

I look forward to providing more insights into how my background in user-centered design principles can be an asset to your organization. You may contact me via phone or email at your earliest convenience. Thank you for your time and consideration.

Sincerely,

Gerald Coulter
