[month, day, year]

Dear Ms. Matthews,

As an intern at Portland Technology Inc., I collaborated with a dynamic team of software developers and engineers to design innovative mobile applications for the education industry. While supporting the development of three separate applications, I gained valuable knowledge and training in Agile methodology and software development lifecycles. I believe that my internship and academic experience will allow me to deliver valuable contributions to your organization.

Solaris Software Inc.'s reputation for creating value for users draws me to apply for this position. I am confident that my bachelor's degree in software engineering from the University of Portland and my experience as a software developer intern will allow me to aid your teams in designing scalable applications based on the following achievements from my career:

- Supported the software development team in designing a mobile Android application to aid college students in comparing prices for used college textbooks and subscription services, which garnered over 500,000 downloads following the launch
- Executed an academic project to design an application platform for users to improve vocabulary across 10 different languages by providing a database of common colloquial phrases
- Completed coursework in Python, Ruby on Rails, SQL, Jira, and JavaScript, graduated with summa cum laude distinction, and achieved a 3.8 GPA

I look forward to speaking with you further regarding how my application development experience can aid Solaris Software Inc. in continuing to create value for users. You may contact me via phone or email at your earliest convenience. I appreciate your time and consideration.

Sincerely,

Curtis Jones
