[month, day, year]

Dear Mr. Thompson,

During my internship with Pittsburgh Web Design LLC, I had the opportunity to collaborate with experienced web designers to create elegant layouts, interfaces, and visual assets for a variety of client websites. These experiences have allowed me to acquire an intricate knowledge of mobile-first design principles, which will enable me to deliver valuable contributions to your organization in the web designer position.

Web Design Pros' reputation for its creative visual designs is what draws me to apply for this position. I believe that I can aid your organization in continuing to provide high-quality deliverables to your clients based on the following achievements from my internship and academic career:

- Provided support to the web design team for the development and redesign of five client websites in HTML and ASP.NET, which included creating website templates in Photoshop
- Supported the development of responsive user interfaces and compelling visual assets, including promotional graphics, graphic content, and web layouts
- Completed an academic project to design a custom website featuring news on E-sports events using HTML and Ruby on Rails, which included creating graphic designs in Adobe X

I look forward to speaking with you further to provide more insights into how my graphic design and UI design skills can help your organization develop high-quality websites for your clients. You may contact me via phone or email at your earliest convenience. Thank you for your time and consideration.

Sincerely,
Joseph Morgan
